

Marc Gold & Associates'
3 DAY TRAINING WORKSHOP ON
SYSTEMATIC INSTRUCTION!!!
 With Michael Callahan, www.marcgold.com

Sponsored by Clallam County Health and Human Services

Since the mid-seventies MG&A has provided training workshops on teaching strategies for persons who find it difficult to learn. Marc Gold demonstrated training strategies, and the competence of the learners with whom he worked, by asking persons with disabilities to allow him to teach them to assemble a fourteen step bicycle brake. Gold organized the strategies he had developed into a system for instruction he called "Try Another Way" which he presented in three day workshops. These demonstrations were credited with raising the expectations of thousands of people associated with the human service field.

Michael Callahan and an assistant MGA trainer will take us through the classic three day training session. The three days will include information, hands-on workshop experience using the Try Another Way training methodology, and actual training sessions with people with significant disabilities in the classroom and community.

Join us for this once in a lifetime opportunity... space is limited to 16 participants and 8 nonparticipating observers

Please register to secure your spot...
